- mcdonaldsamure91@gmail.com
- Lagos, Nigeria
- certifieddonnie.github.io

PROFILE SUMMARY

Results-oriented Software Engineer with a strong academic foundation in algorithms and data structures. Proficient in Python, C and Django, React. Passionate about developing scalable, high-quality software solutions. Eager to leverage strong problem-solving skills and attention to detail to contribute to the Company's engineering goals.

EDUCATION

- 2023 - 2027
UNIVERSITY OF LAGOS
- Bachelor of Mathematics Science

WORK EXPERIENCE

- Varsigram Inc.** 2024 - PRESENT
Technical Team Lead & Developer
- Led and mentored a development team while actively contributing to system design, code implementation, reviews, and architectural decisions to deliver scalable, high-quality software solutions.
 - Managed end-to-end development workflows—including planning, API integration, testing, and deployment—while enforcing best practices, clean code standards, and performance optimization.
 - Tools & Technologies: Python, Django, PostgreSQL, JavaScript, Redis, Github Actions CI/CD, Server Configuration

SKILLS

- Project Management
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Problem Solving

- ALX Africa** June 2022 - July 2023
Software Engineer Student

- Completed a 12-month Software Engineering program, contributing to end-to-end software and web application development—from initial design through testing, deployment, and full lifecycle launches—while building scalable backend systems and data-driven front-end features.
- Developed and maintained functional databases and applications, integrated RESTful APIs and third-party services, optimized legacy and new solutions, and wrote clean, efficient code using modern web technologies while continuously improving engineering best practices.
- Tools & Technologies: Python, Flask, MongoDB, MySQL, JavaScript, TypeScript, C, Shell Scripting, Redis, Git

LANGUAGES

- English: Fluent
- Spanish: Beginner

- NITDA BLOCKCHAIN** Dec 2022 - May 2023
Blockchain Developer Intern

- Gained foundational knowledge of Bitcoin and blockchain networks
- Utilized tools and technologies including Golang, JavaScript, and Blockchain frameworks
